NEWS ALERT

Gradient Receives National Certification as a Women-Owned Business Enterprise

We are pleased to announce that Gradient was recently certified as a Women's Business Enterprise by the Center for Women and Enterprise, a regional partner of the Women's Business Enterprise National Council (WBENC). As part of the certification process, Gradient underwent a comprehensive review of our business and management practices to confirm that women own and operate more than 51% of our company.

For nearly 25 years, Gradient has helped our clients address challenging environmental problems by employing sound science and rigorous data analysis. As leaders in our scientific specialties, including Toxicology, Epidemiology, Risk Assessment, Product Safety, Contaminant Fate and Transport, and Environmental/Forensic Chemistry, we are at the forefront of the latest developments in science, often contributing to such advances ourselves. With Gradient's new certification as a women-owned business, we can commit ourselves to promoting diversity while continuing to provide our clients with the superior scientific talent that has made our company a leader in its field.

WBENC is the nation's largest third-party certifier of businesses owned and operated by women in the US, and is a resource for the 700+ US companies and government agencies that rely on its certification as an integral part of their supplier diversity programs. For more information on WBENC, please visit www.wbenc.org.
